Healthcare

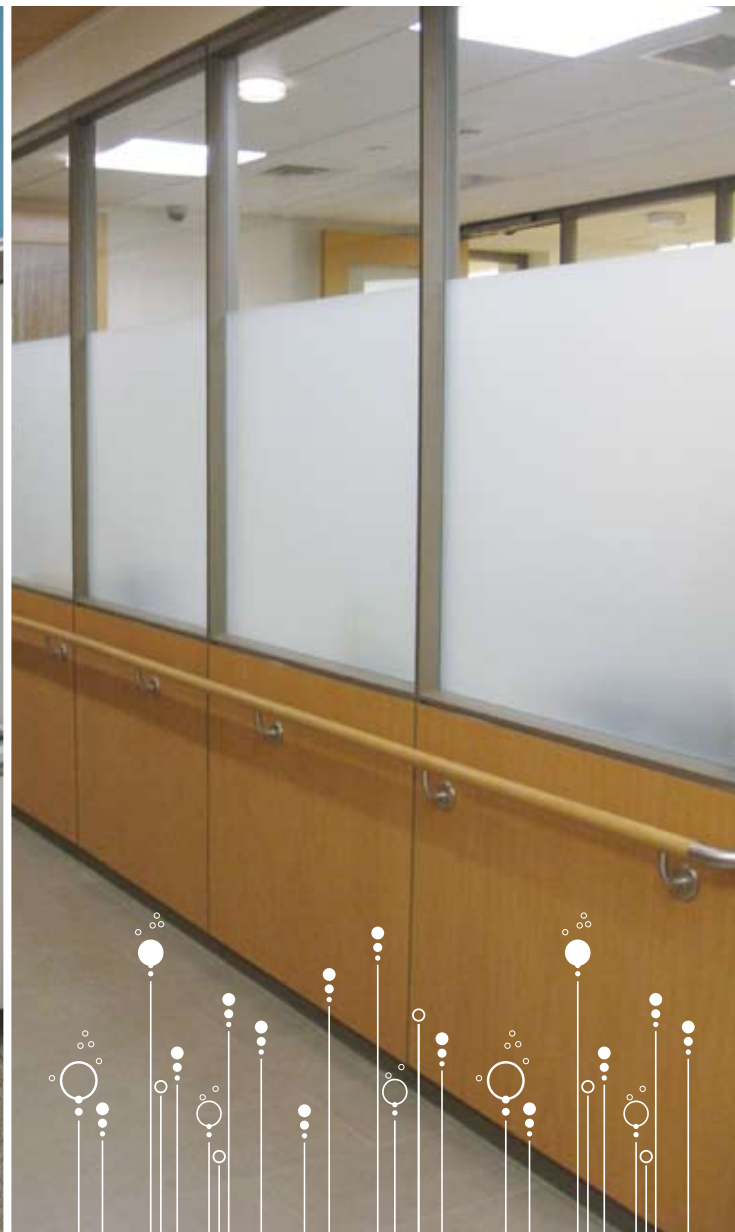

A MAN'S HEALTH CAN BE  
JUDGED BY WHICH HE TAKES  
TWO AT A TIME – PILLS OR STAIRS.

– Joan Welsh

Healthcare facilities are some of the most technologically intensive, fastest changing spaces. Oh, and by the way they have to provide an empathetic human experience for patients, visitors and staff. Success comes down to better care and improved outcomes.

DIRTT Walls satisfy all these criteria.

They offer customized, accessible support for medical gasses, equipment, plumbing, power/data, handrails, furniture, storage, and audio/visual systems. The challenges of infection prevention and layout consistency are also met with rigor. DIRTT offers anti-bacterial finishes and the ability to design same placement of equipment in every room, making fewer opportunities for infections and mistakes.

## DIRTT ENVIRONMENTAL SOLUTIONS

For patients, the Walls support the little things that make a medical stay more comfortable – like iPod docking stations, USB ports, artwork and accessories for a tidy display of cards and photos. It doesn't end there. The quick, clean initial construction continues for a long, environmentally sustainable life cycle through large or small moves, adds and changes.

It's nice when the medical facility is the picture of health too.
