IF OPPORTUNITY
DOESN'T KNOCK
BUILD A DOOR

- Milton Berle

Our favorite is the sliding door. We can't help it. It's quiet, doesn't need a floor track, quick to install, smooth and easy to operate, offers amazing acoustics, is non-handed, plus it saves square feet like there's no tomorrow. Our sliding doors can be solid, framed glass, frameless glass and double. But we know there is a place in the world for other kinds of doors, so we also have very nice pivot and butt hinge doors.

DIRTT ENVIRONMENTAL SOLUTIONS

More about the Sliding Door you say? The little things make our Sliding Doors such a great choice. Acoustic seals, ADA compliant pulls, discreet little feet to hold the door firm to the wall, the ability to put it inside or outside the room and flip it around if that room gets reconfigured.

Our Pivot Doors also come in framed or frameless glass, solid and double, they also are available with automatic closers. Plus we developed a daring Center Pivot Door that is simply clean, elegant fun.

The workhorse Butt Hinge door can be sourced locally and we will simply supply the hardware. Lock hardware and/or signage options are available for each door type.
