

# BRACKETS

One of the biggest benefits of DIRTT Walls is the universal horizontal support. Not only does it eliminate issues with module sizes, it also accepts virtually any manufacturer's overheads, furniture and cabinetry. These Brackets are designed to bring those worlds together. (In some cases a bracket may need modifications to suit a particular manufacturer's product.) Prices are the recommended sale price and do not include freight.

W/S DEPTH	PART NO.
1"	67694
